## FRUIT DEPARTMENT

Marshalls grow Better Built Trees. Our fruit trees are grown by the cut-back method. Our best grade of apple, cherry and pear trees are mostly 3 years old -- our plums, peaches and apricots 2 years old --- a year older than fruit trees handled by many other concerns.

SPECIMEN GRADE is our best grade, specimens picked from our 5 to 6 foot trees --- well-headed, - except cherry 4½ to 5 feet.

SELECT GRADE is a #1 tree 4 to 6 feet. Cherry 3½-4'.

STANDARD GRADE is our smallest grade 4 to 5' trees, cherry around 3½ feet.

## PLUM VARIETIES

Be sure to have more than one variety in a planting to get good pollination. Superior is one of the best to pollinate the blossoms of other varieties. (Sapa and Opata are bush type.)

THIS MAP SHOWS ZONE FOR SHIPPING POINT  
PRICE LIST SHOWS DELIVERED PRICE FOR ZONE  
FOR POINTS NOT INDICATED WRITE FOR QUOTATION

Sell material listed at the zone price for your territory. The first column is a base for commissions only.

Your services for planting, supervision, handling & unloading should be considered when selling these materials. The cost of this service should be added to your order as a separate charge.

The company will expect you to furnish labor to unload the materials quoted herein at the delivery point. Your orders will be accepted subject to this condition.

More careful handling and planting is necessary with larger stock. It is imperative you instruct your customer how to care for large stock after it is planted. If nursery stock is not handled carefully, replacements become larger. Too many replacements can damage our reputations, -- yours and ours.
